FIEL MARK E. ORONOS

Web Designer and Developer | Administrative Support & Digital Solutions

Concepcion, Tarlac, Philippines | +63 994 236 7362 | oronosfielmark@gmail.com
Portfolio: oronex-dev.github.io/portfolio-fiel-mark | GitHub: github.com/oronex-dev

PROFESSIONAL SUMMARY

Computer Science student who builds responsive business websites and database-driven applications. Contributed frontend and backend components to an academic team project covering authentication and database management, and developed a Flutter journaling app. Brings practical administrative experience in inventory records, spreadsheets, and document organization, and uses AI-assisted development tools to support technical workflows.

PROFESSIONAL EXPERIENCE

Website Developer (Client Project) **January 2026 – Present**
HiCOOL PH / HiCOOL Ice Plant | Concepcion, Tarlac

- Develop and customize responsive business website sections using Squarespace, HTML, and CSS.
- Design and refine landing pages, navigation, and product displays to present offerings clearly to site visitors.
- Test layouts across desktop and mobile screen sizes to improve usability and visual consistency.

Administrative & Inventory Support (Part-Time) **November 2024 – Present**
8327 Ever Ani Farm Enterprises | Concepcion, Tarlac

- Maintain hardware inventory records and product information in Google Sheets to support business recordkeeping.
- Organize receipts, transaction documents, and spreadsheets for accurate filing and quick reference.
- Encode, review, and update business information to keep administrative records accessible and organized.

Computer Laboratory Intern **August 2024 – October 2025**
Concepcion Holy Cross College, Inc. | Concepcion, Tarlac

- Assisted in monitoring laboratory computers and supported routine technical operations.
- Encoded and organized student records using Microsoft Excel and Google Drive.
- Supported instructors with workstation preparation, document management, and daily laboratory operations.

SELECTED TECHNICAL PROJECTS

SBAA School Management Portal — Academic Team Project **Vue.js | Node.js | MySQL**

- Developed frontend and backend components for a role-based academic management system serving administrators, faculty, and students.
- Implemented account authentication, student records, grades, schedules, and announcements; completed local testing and prepared the system for pilot deployment, including database connectivity and cloud integration.

Mindful Journal — Flutter Mobile Application **Flutter | Dart**

- Developed a journaling app with journal entries, mood tracking, and personalized interfaces, and designed responsive screens for each feature.
- Built and tested Android application packages and a browser-based version.
